EXAMINER'S AMENDMENT

1.   An examiner's amendment to the record appears below. Should the changes and/or

additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR

1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the

payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with

Mr. Charles Warren (Reg. No. 27,407) on September 12 2005.

2.   The application has been amended as follows:

Claim 1 (Amended) A method implemented by a server comprising the steps of:

receiving first information having at least a first instruction, names, and location

indicators at the server to execute a target program that is unsupported by a server application,

wherein the names identify the server application and the target program where both the server

application and the target program are located on the server, and wherein the location indicators

serve to locate the server application and the target program, and wherein the name of the target

program is received in a format not understood by a supported program residing on the server;

and

employing a second instruction in the supported program residing on the server to

convert the name and the location indicator of the target program into a format understood by the

supported program and a second instruction in the supported program causing execution of the

target program, wherein the second instruction is based on the first instruction, wherein the

supported program is supported by the server application.

Claim 4 (Amended) The method of claim 3 further comprising the step of identifying a directory

location of the target program in the server based on the ASCII characters <u>and the converted</u>

<u>location indicator</u>.

Claim 8 (Amended) A server, comprising:

a component that receives first information having at least a first instruction, names, and

location indicators to execute a target program that is unsupported by a server application,

wherein the names identify the server application and the target program where both the server

application and the target program are located on the server, and wherein the location indicators

serve to locate the server application and the target program, and wherein the name of the target

program is received in a format not understood by a supported program residing on the server;

and

a component that employs a second instruction in the supported program to convert the

name <u>and the location indicator</u> of the target program into a format understood by the supported

program and <u>a second instruction in the supported program</u> causing execution of the target

program, wherein the second instruction is based on the first instruction, wherein the supported

program is supported by the server application.

Claim 11 (Amended) The server of claim 10 further comprising a component that identifies a

directory location of the target program in the server based on the ASCII characters <u>and the</u>

<u>converted location indicator</u>.
